

Request for Proposal (RFP)
for
Onboarding of an Agency for
Design, development, and implementation of
‘Data Analytics Solution’
for
Department of School Education and Literacy (DoSE&L)

October 2024

School Education Division
National Informatics Centre
Ministry of Electronics & Information Technology
Government of India

Disclaimer

The sole objective of this document (Request for Proposal) is to solicit Techno commercial offers from interested NICS I Empaneled Tier-III agencies for the scope of work as mentioned in this document. While this document has been prepared in good faith, no representation or warranty, express or implied, is or will be made, and no responsibility or liability will be accepted by NIC/NICS I or any of their employees, advisors, or agents as to or in relation to the accuracy or completeness of this document and any liability thereof is hereby expressly disclaimed. Each Bidder should conduct their own investigations and analysis and should check the accuracy, reliability, and completeness of the information in this RFP Document and wherever necessary, obtain independent advice from appropriate sources.

Interested Parties may carry out their own study/analysis/ investigation as required before submitting their Techno commercial proposals.

This document does not constitute an offer or invitation, or solicitation of an offer, nor does this document or anything contained herein, shall form a basis of any agreement or commitment whatsoever.

NIC/NICS I Representatives, its employees and advisors make no representation or warranty and shall incur no liability under any law, statute, rules or regulations as to the accuracy, reliability or completeness of the RFP Document.

Some of the activities listed to be carried out by NIC/NICS I subsequent to the receipt of the responses are indicative only. NICS I has the right to continue with these activities, modify the sequence of activities, add new activities or remove some of the activities, as dictated by the best interests of NIC/NICS I.

1 Factsheet

Particulars	Details
Name of Organization	National Informatics Centre Services Inc. (NICS)
Service Category	Design, development, and implementation of 'Data Analytics Solution'
Date of Publication	07.10.2024
Pre-Bid queries submission last date:	09.10.2024 till 11:00 Hours
Pre-bid Meeting Date & Venue:	09.10.2024 at 11:30 Hrs. at Conference Hall, Ground Floor, NICS.
Last date and time for Bid submission	14.10.2024 at 10:00 Hrs. Proposals that are received late WILL NOT be considered in this procurement process
Opening of Bids	14. 10.2024 at 11:00 Hrs.
Opening of Financial Bids	Will be Informed Later
Issuance of Work Order	Will be Informed Later
Re-Bid Submission allowed?	Yes (Before last date of bid submission)
Bid Withdrawal allowed?	Yes (Before last date of bid submission)
Address for Communication	Shri Kumar Jyoti, Senior Manager National Informatics Centre Services Inc. Ground Floor, 15 NBCC Tower, Bhikaji Cama Place, New Delhi-110066 Email: kumar.jyoti@nic.in , Phone: 011-22900517

2 Definitions

In this document, the following terms shall have respective meanings as indicated:

- **"NICS"** shall mean National Informatics Centre Services Incorporated, New Delhi. The term NICS includes successors and assigns of NICS.
- **"NIC"** shall mean National Informatics Centre, New Delhi.
- **"Client"** shall mean the department/organisation for which the order is being placed.
- **"e-Governance"** ICT (Information and Communication Technology) based projects in government sector.
- **"Consulting Service"** means any subject matter of procurement (which as distinguished from 'Non Consultancy Services' involves primarily non-physical project-specific, intellectual and procedural processes where outcomes/ deliverables would vary from one consultant to another), other than goods or works, except those incidental or consequential to the service, and includes professional, intellectual, training and advisory services or any other service classified or declared as such by a procuring entity.
- **"RFP"** shall mean Request for Proposal, Tender Document or Bidding Document including the written clarifications issued by NIC/NICS in respect of the RFP.
- **"Authorized Representative/Agency"** shall mean any person/agency authorized.
- **"Contract"** shall mean the Work Order placed by NICS on successful Bidder and all attached exhibits and documents referred to therein and all terms and conditions thereof together with any subsequent modifications thereto.
- **"Financial Year"** (FY) period from 1st of April till 31st of March of subsequent year.
- **"Site"** shall mean the location(s) for which the work has been allotted and where the services are to be delivered.
- **"Specifications"** shall mean and include schedules, details, description, statement of technical data, performance characteristics, standards (Indian as well as International) as applicable and specified in the Bidding Documents.
- **"Bidder"** means the firm/consortium offering the solution(s), services and/or materials required in the RFP. The word Bidder when used in the pre award period shall be synonymous with Bidder, and when used after intimation of Successful Bidder shall mean the Successful Bidder, also called "Agency", on whom NICS places Work Order for Delivery of services.
- **"Party"** shall mean NICS or Bidder individually and "Parties" shall mean NICS and Bidder collectively.
- **"Services"** means requirements defined in this document including all additional services associated thereto to be delivered by the Bidder.
- **"SME"** means subject matter expert is an individual with a deep understanding of a particular job, process, department, function, technology, machine, material or type of equipment.
- **"Offices"** means any establishment described as a Registered Office, Corporate Office or Branch offices by the company(bidder).
- CEDA - Centre of Excellence of Data and Analytics
- DoSE&L – Department of School Education and Literacy
- MoE – Ministry of Education

- NAD - National Academic Depository
- NAS - National Achievement Survey
- NILP - New India Literacy Programme
- NLP – Natural Language Processing
- PGI - Performance Grading Index
- UDISE plus - Unified District Information System for Education Plus

3 Project Background

3.1 About NICS

The National Informatics Centre Services Inc. (NICS) was set up in 1995 as a section 25 Company (now Section 8 Company) under National Informatics Centre, Ministry of Electronics & Information Technology, Government of India to provide total IT solutions to the Government organizations. NICS provides services for several e-Governance projects undertaken by NIC and MeitY.

Main Objectives:

- To provide economic, scientific, technological, social and cultural development of India by promoting the utilization of Information Technology. Computer-Communication Networks, Informatics etc. by a spin-off of the services, technologies, infrastructure and expertise developed by the NIC of the Government of India including its Computer-Communication Network, NICNET and associated infrastructure and services.
- To promote further development of services, technologies, infrastructure and expertise supplementing that developed by NIC in directions which will increase the revenue earning capacity of NIC.
- To develop and promote value added computer and computer-communications services over the basic infrastructure and services developed by NIC including NICNET.

In furtherance of these objectives, NICS has been providing various products & services to organizations in the Central Government, State Governments and PSUs etc. Products and Services include Hardware, Systems Software, Application Software, Software Development, Intra-Networking, Wide Area Networking, Video Conferencing, IT Consultancy, IT Implementation Support among others.

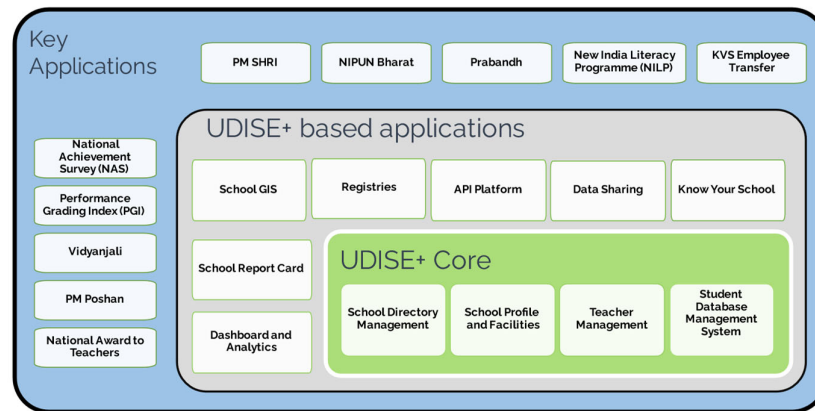

3.2 About NIC

National Informatics Centre (NIC) plays a pivotal role in bolstering the education sector in India, which is a key driver of the nation's economic growth. NIC offers digital solutions to the Indian Government, aiding in the implementation of various initiatives aimed at enhancing access to primary and higher education across the country. Specifically, in relation to School Education, the **NIC's School Education Division** offers a range of web and mobile services to the Department of School Education & Literacy.

NIC also support the government taskforce for building more resilience in the education system by introducing education technology for overcoming the disruptions caused by the Covid-19 pandemic. **The range of services covers various domains like school education, higher education, counselling, examinations, and results.**

NIC - School Education Division manages following landscape of applications - National Achievement Survey (NAS), Performance Grading Index (PGI), Vidyanjali, PM POSHAN, National Award to Teachers, PM SHRI, NIPUN Bharat, Prabandh, New India Literacy Programme (NILP), KVS Employee

Transfer, Unified District Information on School Education plus (**UDISE+**) based applications such as School GIS, School Report Card, School Education Dashboard & Analytics, Digital Repository, Registries, API Solution, Data Sharing and Know Your School etc.

NIC, being a service provider at different levels of student/faculty lifecycle, also holds the nationwide database that can be used for data backed decision making essential to the framework.

3.3 About Project

India has the world's largest education system, with over **14.89 Lakhs schools** catering to over **26.52 Crore children** and **95.07 Lakhs teachers**. During the pandemic, the adoption of EdTech accelerated in government schools. The education ecosystem generates an immense quantity of data that could be used for improving sector governance through streamlining processes, bringing transparency and accountability into the system, and improving learning outcomes through data driven decision-making.

Currently, this data resides within **UDISE+ (Unified District Information System for Education Plus)** and various program-specific applications like PM Poshan (mid-day meal scheme) and National Achievement Survey (NAS). However, the current data landscape is fragmented, hindering the Department of School Education and Literacy (DoSE&L)'s ability to leverage its full potential for informed decision-making.

This project proposes the development of a & Data Analytics solution, spearheaded by NICSI in collaboration with CEDA (Centre of Excellence of Data and Analytics).

3.4 Key Challenges

The current education data landscape in India faces several challenges as listed below:

1. **Limited Accessibility:** Stakeholders often lack easy access to relevant data, hampering informed decision-making.
2. **Limited Analytics Capabilities:** The absence of robust data analytics restricts the DoSE&L's ability to identify trends and measure program effectiveness.

- 3. Linking of data across heterogeneous applications:** managed and maintained by different stakeholders, also poses a challenge to the creation of a unified view of education sector data.

These limitations hinder the DoSE&L's ability to effectively manage and improve the education system. To mitigate above challenges and leverage the data potential, there is need for creating a data analytics solution which shall have capability to integrate with school education data sources / warehouse solution to retrieve, consume, analyze, monitor, visualize and generate data insights.

4 Scope of Work (SoW)

4.1 Description of the work

The Data Analytics solution shall directly address these needs by developing advanced analytics capabilities. By addressing these needs, the project will deliver a multitude of benefits for the DoSE&L and the entire education system such as improved data-driven decision making, enhanced program effectiveness, targeted interventions, increased transparency and accountability, greater efficiency, and cost savings.

This Analytics solution shall empower DoSE&L stakeholders at all levels with data-driven insights to improve decision-making, resource allocation, and overall educational outcomes. The solution will offer user-friendly functionalities for data exploration, visualization, and reporting. Users will be able to access and analyze data through intuitive dashboards and reports tailored to their specific needs.

4.1.1 Data Sources

The project will focus on integrating data from various schemes under Department of School Education and Literacy (DoSE&L). This includes, but is not limited to:

1. UDISE+
2. PRABANDH
3. Performance Grading Index (PGI) from States and Districts
4. Vidyanjali
5. National Achievement Survey (NAS)
6. PM Poshan
7. PM Shri etc.

The data for 36 States / union territories and some autonomous bodies is readily available from the Department of School Education and Literacy (DoSE&L). However, **current scope shall be limited to the UDISE+ data (School, Student, Teacher, and infrastructure data).**

4.1.2 Existing data volume

Currently various applications of DoSE&L have varying data volumes and data frequency. The details of current data volume and frequency across the application is listed as part of the **Annexure I - Indicative list of data sources for various applications.**

4.2 Key Deliverables

Advanced data analytics tools and functionalities will be implemented for users to explore, analyze, and visualize educational data. This includes capabilities for trend identification, correlation analysis etc.

As part of the solution, user-friendly dashboards and reports will be developed to present data insights using data visualization / custom developed tools such as Tableau, PowerBI etc. in a clear and actionable format. These tools will cater to the needs of various stakeholders, enabling data-driven decision-making.

The analytics solution will provide role-based access of reports and dashboards for National, State, and District users. Each user will have access to curated reports and dashboards based on their specific permissions.

4.3 Target Stakeholders

The data analytical capabilities are designed for users within the DoSE&L ecosystem, including those from:

1. Department of School Education and Literacy (DoSE&L)
2. State Education Departments
3. District nodal officers of State Education Departments
4. Autonomous bodies of School Education

4.4 Inclusion

1. Design and development of Data Analytics Solution
2. Software execution
3. Application Audit
4. Log maintenance
5. Train the nodal officers of DoSE&L using both online or offline mode
6. PMU for overall coordination, management, and monitoring of the system.

5 Proposed Solution

5.1 Project Objectives

The project aims to establish a Data Analytics Solution for the Department of School Education and Literacy (DoSE&L) in India to generate insights by leveraging cross-application data.

5.2 Solution Overview

The proposed solution addresses the DoSE&L's need for a robust analytics solution to leverage and utilize educational data effectively. This solution will empower stakeholders at all levels with data-driven insights to improve decision-making, resource allocation, and overall educational outcomes.

5.3 Proposed Visualization Tool

Effective communication of data insights is crucial for driving informed action. The Data Analytics solution will incorporate user-friendly reporting and visualization tools to empower DoSE&L stakeholders to easily access and understand data-driven insights.

Data visualization tools such as Power BI, Tableau etc. shall be used for data exploration, analysis, and visualization. These tools offer several advantages such as:

1. **Intuitive Interface:** A user-friendly interface with drag-and-drop functionalities allows users with varying technical backgrounds to create reports and visualizations.
2. **Rich Visualization Capabilities:** provides a wide range of built-in charts, graphs, and maps to effectively represent complex data in clear and actionable formats.
3. **Interactive Dashboards:** Users can create interactive dashboards that provide a consolidated view of key metrics and enable them to drill down into specific data points for deeper analysis.
4. **Integration with the Data Warehouse:** data visualization tools seamlessly integrates with the data warehouse, ensuring users have access to the most up-to-date data for their reports and visualizations.

By providing user-friendly and visually compelling reporting and visualization tools, the project will bridge the gap between data and action. Stakeholders across the DoSE&L will be empowered to leverage data insights for informed decision-making, ultimately leading to improved educational outcomes for all students in India.

5.3.1 Types of Analytics

There are four primary types of analytics, each serving a distinct purpose in the analysis of data which are as follows:

- i. **Descriptive Analytics** – Descriptive Analytics would provide an analysis of the historical data sets, to identify key trends, exceptions, milestones achieved, identify improvement areas, and present the information to stakeholders in an intuitive, user-friendly manner.
- ii. **Diagnostic Analytics** – Diagnostic Analytics would leverage data to look under the hood, and establish correlations, root cause analysis, etc.
- iii. **Predictive Analytics** – Predictive Analytics would enable users to make predictions in a futuristic manner and extend data relationships from sample-based analysis to a population.

- iv. **Prescriptive Analytics** – Prescriptive Analytics is the most mature state on the analytics continuum, where the users are able to make data-based recommendations on what should happen?

The current scope of data analytics shall be limited to **Descriptive Analytics and Diagnostic Analytics** based on UDISE+ data. **Indicative dashboard / KPIs data analytics on Data Analytics solution is attached at Annexure -III.**

5.4 Role based Access

Data Analytics solution shall provide Role-Based Access to users. There would be mainly four roles identified National level users, State Level users, District level users and School Level users. Different users shall have different view of dashboards and analytical reports based on the role.

5.5 Security Audit

An application security audit shall be conducted by a Cert-In empaneled security audit agency, and a security audit certificate shall be provided before going live.

5.6 External Integration

NA

5.7 Derived Benefits

By addressing the project requirements, DoSE&L and the entire education system will get a multitude of benefits such as:

1. **Enhancing data accessibility:** Providing user-friendly interfaces and tools for stakeholders to access and analyze relevant data seamlessly.
2. **Data-driven policymaking** for optimized resource allocation and improved learning outcomes.
3. **Improved Data-Driven Decision Making:** The DoSE&L will gain access to actionable insights for evidence-based policy formulation and resource allocation optimization. For e.g. Student-Teacher Ratio (STR), Gross Enrollment Rate (GER), and Pupil-Teacher Ratio (PTR) analysis can be done to evaluate school efficiency
4. **Enhanced Program Effectiveness:** Data-driven evaluation will allow the DoSE&L to track the impact of educational initiatives and make data-informed adjustments for continuous improvement.
5. **Targeted Interventions:** By identifying areas of disparity and need, the DoSE&L can develop targeted interventions to address specific challenges and promote equitable access to quality education.
6. **Increased Transparency and Accountability:** Stakeholders will have greater access to data on educational performance, fostering transparency and accountability within the system.

6 Implementation Plan

The development of analytics functionalities will be staged over a 3 month period, with each month focusing on specific data exploration and visualization features.

SN	Activity	Month 1				Month 2				Month 3			
		W1	W2	W3	W4	W5	W6	W7	W8	W9	W10	W11	W12
1	School Dashboard (20 KPIs) and drill down												
2	Teacher Dashboard (15 KPIs) and drill down												
3	Student Dashboard (20 KPIs) and drill down												
4	Overall Summary Dashboard (10 KPIs) and drill down												
5	School Infrastructure (50 KPIs) and drill down												
7	Cross Area (School, Student, teacher, and infrastructure) (20 KPIs) and drill down User Management												
8	Other KPIs (20 KPIs) and drill down												

7 Project Deliverables and Acceptance Criteria

The key project deliverables and their corresponding acceptance criteria is as follows:

7.1 Key Deliverables for Data Analytics Solution

S.N.	Features	Expected Completion date (In Weeks)
1.	▪ School Dashboard and drill down	T+2
2.	▪ Teacher Dashboard and drill down	T+2
3.	▪ Student Dash boardand drill down	T+3
4.	▪ Overall Summary Dashboard and drill down	T+5
5.	▪ School Infrastructure and drill down	T+7
6.	▪ Cross Area (School, Student, teacher, and infrastructure) and drill down ▪ User Management	T+9
7.	▪ Other KPIs and drill down	T12

7.2 Acceptance Criteria for Data Analytics Solution

1. The data analytics solution is functional and accessible to authorized users.
2. Users can successfully apply filters (State, District, etc.) to explore UDISE+ data.
3. The solution delivers reports and visualizations as specified in the implementation plan for each month.
4. Visualizations are clear, informative, and interactive (where applicable).
5. Data displayed within reports and visualizations is accurate and consistent with the underlying data in the warehouse.
6. Stakeholders can effectively utilize the solution to conduct data exploration and analysis to gain insights into the education system.

7.3 Key Deliverables for User Documentation and Training

7. **User manuals and guides:** Comprehensive documentation for the Data Analytics Solution, including:
 - i. Instructions for accessing and navigating the solution.
 - ii. User guides for interpreting reports and visualizations.
 - iii. (Optional) Advanced guides for performing complex data analysis or creating custom reports.
8. **Training sessions:** Training workshops conducted for stakeholders on using the Data Analytics Solution effectively. The training will cover:
 - i. Solution functionalities and navigation.
 - ii. Data exploration techniques and best practices.
 - iii. Utilizing reports and visualizations for data analysis.
 - iv. (Optional) Advanced training on performing complex data analysis or creating custom reports.

7.4 Acceptance Criteria for User Documentation and Training

1. User manuals and guides are clear, concise, and informative, providing adequate instructions for using the solution.
2. Training sessions are conducted effectively, and trainees demonstrate a good understanding of how.

8 Roles and Responsibility

The project will be led by a dedicated project manager who will oversee all aspects of the project lifecycle. The key project team will consist of the following members:

1. **Project Manager:** Responsible for overall project planning, execution, monitoring, and risk management.
2. **Senior Business Analyst:** Responsible for working with stakeholders to understand data analysis requirements and translate them into technical specifications for the data analytics solution.
3. **Senior Data Visualization Expert:** Responsible for development of dashboards and visualizations

8.1 NIC

- i. NIC will give utmost priority and put up dedicated teams for timely completion of tasks as per the timeframes envisaged, provided timely inputs are made available by Department of School Education & Literacy (DoSE&L) for the design and development of the Data Analytics Solution.
- ii. Support of application would be carried out at NIC's software Development Centre.
- iii. NIC will impart training and hands-on sessions to DoSE&L.
- iv. NIC will provide SRS and user/training manual.
- v. NIC will deploy adequate resources in the technical support constituted at NIC School Division / offsite (NICSi empaneled agency office) / Any other suitable location to resolve technical issues.
- vi. NIC will ensure possible information secrecy and security in its network and databases for all facilities and services as per the current technology standards and to the extent feasible keeping in view of resource constraints and involved sensitivity. NIC will respect the information propriety of DoSE&L and will provide all mutually agreed safeguards, which are feasible within the current ambit of technical feasibility and resource constraints.

8.2 NICSi

- i. NICSi will open a project on receipt of funds from DoSE&L for maintaining accounts under various proposed heads.
- ii. NICSi will timely procure all required hardware, software, and consumables through its empaneled vendors/GeM for the project in tune with timelines of execution.
- iii. NICSi shall ensure that the associated vendors have demonstrated the capacity to serve the interest of the project.
- iv. In the event of any damage/shortage/defect to the articles during supply process, NICSi will arrange for their replacements through the concerned vendor at the cost of the vendor.
- v. NICSi may hire required skilled manpower resources / outsource through its empaneled vendors for the support and extensibility of application services. This team will be deployed at NIC School Division / empaneled agency office / any other suitable location for the application support, extensibility, and training under the supervision of NIC as per the requirement of the project.
- vi. NICSi, from Project funds provided by DoSE&L will bear the applicable TA/DA, local conveyance, recurring expenses, procurement of stationery, consumables, refreshment bills, etc. for the meetings and other activities as necessary for the project work.

- vii. All original bills regarding service/manpower/hardware request generated in the project will be raised by NICSi in the name of DoSE&L. Original bills regarding service/manpower/hardware request from NIC will be raised by NICSi in the name of DoSE&L. Upon receipt of funds from DoSE&L, NICSi will raise original bills in the name of DoSE&L.
- viii. NICSi shall be entitled to get Operating Margin as applicable from time to time for the cost of total hardware, system software and other services arranged to facilitate the IT outsourcing for Data Analytics Solution implementation.
- ix. All applicable taxes/levies as per government/local bodies will be extra and as per actuals at the time of billing.
- x. NICSi through NIC will submit an annual statement of account/UC if required for the services during the last financial year for specific project requirements.

9 Bid Submission and Selection Criteria

9.1 Selection Process

1. NICSI empanelled Tier III agencies are requested to submit their proposals and make their presentation on the evaluation parameters described below and enclosed documents along with technical proposals (viz. work orders etc.) and submit effort estimation.
2. The proposals received after the due date & time will not be considered.
3. Only one bidder will be selected for the desired job from NICSI Empaneled Vendors. Selection will be based on use of QCBS method.
4. Duly constituted Evaluation Committee will evaluate the proposal vis-à-vis compliance with the requirements reflected in this RFP.
5. Only project mode development work orders will be considered for evaluation.
6. The Bids received shall be evaluated on the QCBS Model (Quality and Cost Based Selection) wherein 70 percent weightage shall be given to technical qualification and 30 percent weightage shall be given to Financial Cost submitted by the Bidder. Cutoff marks for technical qualification shall be 70.
7. The final score for evaluation will be calculated as below and accordingly the Bidder with the highest Final Score shall be treated as the Successful Bidder. However, If the Final scores are 'tied', the Bidder securing the highest technical score will be adjudicated as the Best Value Bidder for award of the Project.
 - o Final Score = (0.70* Normalized Technical Score) + (0.30* Financial Score)
 - o Where Normalized Technical Score of a Bidder = {Technical Score of that Bidder/Score of the Bidder with the highest Technical Score} X 100 (adjusted to 2 decimals)
 - o Financial Score of a Bidder = {Lowest Quote/Bidder's Quote} X 100 (adjusted to 2 decimals)
8. The vendor selected for placement of work order shall give security deposit as per NICSI Empanelment norms. NICSI will have the right to invoke the security deposit if the performance of the selected vendor is not found up to the mark.
9. Schedule of payments will be linked to project deliverables and timelines as follows:

Deliverables, Timelines and Payment Schedules for Data Analytics Solution (3 Months)				
#	Stage	Activities	Time -in Weeks (Cumulative Time)	Payments
1	Design, development, and implementation of Data Analytics Solution	Issuance of Workorder	T0	Upto 5 % payment
		End to end development of following modules of Data Analytics Solution ▪ User Management ▪ School Dashboard and drill down ▪ Teacher Dashboard and drill down	T1 = T0+ 2 (2 Weeks)	5 % payment
		End to end development	T2 = T0+ 3	10 %

	of following modules of Data Analytics Solution ▪ Student Dashboard and drill down	(3 Weeks)	payment
	End to end development of following modules of Data Analytics Solution ▪ Overall Summary Dashboard and drill down	T3 = T0+ 5 (5 Weeks)	10 % payment
	End to end development of following modules of Data Analytics Solution ▪ School Infrastructure and drill down	T4 = T0+ 7 (7 Weeks)	10 % payment
	End to end development of following modules of Data Analytics Solution ▪ Cross Area (School, Student, teacher, and infrastructure) and drill down	T5 = T0+ 9 (9 Weeks)	10 % payment
	a) End to end development of following modules of Data Analytics Solution ▪ Other KPIs and drill down b) Quality assurance and debugging b) Successful deployment and GO Live of Solution	T6 = T0+ 12 (9 Weeks)	50% payment

Note:

- a) The department shall review and approve or reject the deliverables within 15 days after receipt from the successful bidder.
- b) The successful bidder must provide deployment support for the application at the designated infrastructure defined by the department without seeking for any additional cost assistance.
- c) Payment to the bidder will be made upon successful completion of each milestone, following approval from both the user department and CEDA.

10. Technical Proposals and Presentation

- Technical Evaluation will be undertaken of only those vendors who have submitted both proposals (financial and technical).
- Technical Bid Evaluation shall be based on the scrutiny of documents attached with technical proposals and duly attested by the authorised person. Bidders shall ensure that there is no overwriting/cutting/fudging in the information submitted.
- The agencies are required to make a technical presentation to the Evaluation Committee on 14th October 2024 at 11:30 AM.

11. Financial Proposal

- a. Financial proposals of agencies have to be in standard NICSI format. The proposal should have a break-up of each phase.
- b. The organisations, in their financial proposal, must include a breakdown of all costs that are to be charged.
- c. Organisations need not include taxes in calculation of the bid as those would be applied as per the prevailing policy of the Government.
- d. In case of a single technically qualified bidder, the financial proposal of that bidder only will be evaluated, and work may be assigned to that vendor after due negotiation.
- e. The department also reserves the right to negotiate with the H1 vendor and provide a counteroffer to reach an agreeable price. If negotiations with H1 are unsuccessful, the department may engage in discussions with H2, H3 and so on vendors at the original price offered by H1

9.2 Criteria for Evaluation

9.2.1 Technical Evaluation Criteria

a) Technical Proposal Format

#	Section heading	Details
1	Technical Proposal covering letter	As per format provided in Form 1 Annexure 4 of this RFP
2	Summary of Bidder's Experience	Summary of technical citations as per Format Provided in Form 2 Annexure 4 of this RFP
3	Citations as per Experience (Bidder)	Citation needs to be provided as per format provided in Form 3 Annexure 4 of this RFP
4	Project Plan	As per format provided in Form 4 Annexure 4 of this RFP
5	Curriculum Vitae (CV) of Key Personnel	CV's as per format provided in Form 5 Annexure 4 of this RFP. <i>CV of any individual should not exceed 5 pages.</i>
6	Resource Deployment Plan	As per format provided in of this RFP in Annexure 4, Form 6
7	Annual Turnover	As per format provided in of this RFP in Annexure 4, Form 7

b) Technical Evaluation Criteria Details

The Bidder's technical solution proposed in the Technical Proposal document will be evaluated as per the evaluation criteria mentioned in the table below:

Summary of Technical Evaluation Criteria		
#	Criteria	Maximum Marks
A.	Annual Turnover	10
B.	Resource Strength	20
C.	Bidder Experience	20
D.	Quality Certification	10
E.	Technical Presentation	40
#	Total Marks	100

Technical Evaluation Criteria for Data Analytics Solution Development																					
#	Criteria	Basis for Evaluation			Supporting Documents	Max Marks															
A. Annual Turnover (10 marks)																					
1.	Annual Turnover	Bidder is an IT System Service Provider, it should have an average annual revenue/sales turnover of at least INR 20 Crores in last 3 financial years (FY 2021-22, FY 2022-23, FY 2023-24) from Data Analytics services, software consultancy, software development & implementation services. Bidder would be evaluated for Turnover as follows: a) Turnover >= 15Crores & <10 Crores – 3 Marks b) Turnover >= 20 Crores & <15 Crores – 4 Marks c) Turnover >= 20 Crores – 5 Marks			- Proof of Average Annual revenue in the last three financial (Form 7 Annexure 4 of this RFP) years (FY 2021-22, FY 2022-23, FY 2023-24) duly certified by a Statutory Auditor or Chartered Accountant (CA). - Copy of digitally signed audited Balance Sheets and Profit & Loss Statements for the last three financial years (FY 2021-22, FY 2022-23, FY 2023-24) & CA certificate	10															
B. Resource Strength (20 marks)																					
2.	Resource Deployment Plan & Governance Structure	Bidder would be evaluated for Resource Deployment Plan & Governance Structure provided end to end development and deployment of Data Analytics Solution			Resource Deployment Plan provided as per Format provided in Form 6 of Annexure 4 of this RFP	8															
3.	Proposed Key Resources	<table><tr><th>Key Personnel</th><th>No of Personnel</th><th>Marks</th></tr><tr><td>Project Manager</td><td>1</td><td>4</td></tr><tr><td>Senior Business Analyst</td><td>1</td><td>4</td></tr><tr><td>Senior Data Visualization Expert</td><td>1</td><td>4</td></tr><tr><td colspan="3">The above key Personnel shall</td></tr></table>	Key Personnel	No of Personnel	Marks	Project Manager	1	4	Senior Business Analyst	1	4	Senior Data Visualization Expert	1	4	The above key Personnel shall			Curriculum Vitae (CV) Format of Key Personnel as per Form 5 Annexure 4 of this RFP			12
Key Personnel	No of Personnel	Marks																			
Project Manager	1	4																			
Senior Business Analyst	1	4																			
Senior Data Visualization Expert	1	4																			
The above key Personnel shall																					

Technical Evaluation Criteria for Data Analytics Solution Development					
#	Criteria	Basis for Evaluation		Supporting Documents	Max Marks
		be evaluated on the following parameters: • Qualification & Certification: 25% • Total experience:25% • Experience in similar assignments: 25% • Interview: 25% • The profiles scored as part of this bid are core members and their replacement would be governed as per NICS I Empanelment • The interview will be scheduled only for the key Personnel mentioned above and the details of the same will be communicated accordingly.			
C. Bidder Experience (20 marks)					
1	Experience in design & development of large scale data analytics solution providing services for data analytics, data visualization tools, and large-scale data integration for any government department / PSU in the last 7 years with each work order having value at least 1 Crores	• Every 'X' project would be awarded 4 marks each. Where 'X' is No. of Projects, and the project cost shall exclude hardware/network/infrastructure cost.		• Citation as per format specified in Form 3 Annexure 4 of this RFP. • Summary of Technical Citations as per format specified in Form 2 Annexure 4 • Work Order + Completion Certificate	20
D. Quality Certifications (10 marks)					
1	ISO Certifications	• ISO 9001:2008/ ISO 9001:2015 (Quality Management) • ISO/IEC 27001:2013 (Security Management) • ISO/IEC 20000:2018 (Service Management) • Every Certificate would be awarded 1 mark each.		Copy of the certificates which will be valid as on the date of Bid submission and shall be valid throughout the	3

Technical Evaluation Criteria for Data Analytics Solution Development				
#	Criteria	Basis for Evaluation	Supporting Documents	Max Marks
2	CMMI Certification	• CMMI Level 3 – 3 Marks • CMMI Level 4 - 5 Marks • CMMI Level 5 - 7 Marks	tenure of the project Please Note: • The certificates shall be in the name of the Bidder	7
E. Technical Presentation (40 marks)				
1	Understanding of the Term of Reference and Existing Solution			5
2	Approach and methodology, project plan (as per Form 4, Annexure -4) proposed technology stack & solution design along with support plan			25
3	Technology expertise and solution architecture & designing			5
4	Key assumptions, risk, innovative solutions, and Unique Selling Point (USP)			5
Total (A+B+C+D+E)				100

9.3 Financial Scoring

Bidder shall share his financials for End-to-end solution Development as per the below mentioned Table 1. Moreover, bidder is also requested to provide the blended man-month rate for estimation during any change request in the project.

Note: Taxes extra as applicable

Table 1: Project & Support Financial		
S. No	Head	Quoted Price
A1	Project Delivery (3 Months)	
A1.1	End to end Design, development, and implementation of 'Data Analytics Solution'	
	Total	A
	Note: - Bidder is also requested to provide the blended man-month rate for estimation of any change request during the project. - For any change request, the bidder shall follow the guidelines as mentioned in Section 9.5 and Annexure V i.e., Change Control Notice Form of this RFP. - All expenses related to travelling, lodging, boarding and other expenses, if not specified in the RFP, will have to be borne by the Bidder.	

9.4 Procedure of Submission of Proposals

- Technical and financial proposals must be submitted as different attachments in the same email, clearly named Technical Proposal and Financial Proposal (in pdf version).
- The pdf file of the financial proposal and Presentation of Technical Proposal must be password protected.**

3. **Note: In case the pdf/presentation is not password protected, the bid is liable to be rejected.**
4. No financial information should be contained in the technical proposal. Mention of any financial information in a technical proposal makes it liable for rejection.
5. Proposals received after the deadline SHALL NOT be considered.
6. The bidders may **submit their queries**, if any, through email on the email id: kumar.jyoti@nic.in . The last date for submission of queries is **9th Oct 2024**. The query title should be **"XXXX_DATA ANALYTICS_NICSI query"**. Queries received after the deadline will not be entertained. Pre-Bid Query submitted in Excel format mentioned below will only be permitted.

I.	II.	III.	IV.	V.	VI.
#	Section (Name)	Page No	Clause No	Statement as per tender document	Query by Bidder
1					
2					
3					
4					
5					

Note: If information is missing in any of the column for a particular query that query will not be admitted

7. Agencies are required to **submit their technical and financial proposal** along-with supportive documents **on or before 14.10.2024 at 10:00 Hrs.** at email kumar.jyoti@nic.in with the subject line. Financial proposals & Technical presentations should be submitted as password protected files.
8. For financial evaluation, agencies who are selected in the technical evaluation will be invited for opening of financial bid. Password is to be shared with the evaluation committee on the date of financial bid opening.

9.5 Change Request (CR)

Over the period the changing dynamics may ignite the need of changes from traditional/ old/ complex processes of Data Analytics Solution to more simplified and advanced Data Analytics Solution. All changes requests should accompany ECN (Engineering Change Notes) Clearly mentioning the scope, Manpower, resources etc. required for functional point measurement.

1. Any changes/customizations to the application performed/ identified within the period of three (3) months post "Go-Live" will not to be considered as separate Change Requests and hence are to be carried out by the Successful/Selected Bidder at no extra cost.
2. All configuration changes or minor customizations to the application which don't involve the creation of any new development object (even if identified after the stabilization period of three months post "Go-Live") will not to be considered as separate Change Requests and hence are to be carried out by the Successful/Selected Bidder at no extra cost.

3. Any major change in the Data Analytics Solution would come under Change request. Change requests will be capped at 15% of the total project value quoted by the Successful/Selected Bidder
4. Only those major functional customization changes (requiring more than 2-man months effort) in the solution which have neither been mentioned in the RFP, nor included in the To-be functional solution and have not been proposed within three (3) months from “Go Live”, shall be carried out through a separate Change Control Note/Notice (CCN) prepared by the Successful/Selected Bidder (format has been provided in Annexure V of this RFP). The effort & cost estimates shall be based on the man-month cost quoted by the Successful/Selected Bidder for Design, Development, Implementation of Data Analytics Solution in the commercial quote (Section 9.3 of this RFP). This cost per man-month shall remain unchanged during the contract period.
5. All Change Requests submitted by the Successful/Selected Bidder will contain an effort estimate, which would be discussed with and approved by the department. The department may ask the Successful/Selected Bidder to provide justification using standard methodology like Function Point Analysis or any similar method.
6. The Successful/Selected Bidder is required to obtain approval from the department for all the proposed changes before implementation of the same into production environment and such documentation is subject to review.
7. The Successful/Selected Bidder is required to keep all such documentation up to date to reflect the latest enhancements/modifications made to the application. All documentation should be prepared as per latest industry standards and should incorporate necessary version control mechanism.
8. All change requests proposed by the bidder shall be critically examined & approved by the Project Implementation Committee of the department.

9.6 Failure to agree with terms and condition of RFP

Failure of the successful bidder to agree with the Draft Legal Agreement and Terms & Conditions of the RFP shall constitute sufficient grounds for the annulment of the award, in which event NISCI may award the contract to the next best value bidder or call for new Bid from the interested bidders.

9.7 Laws Governing the Contract

This contract shall be governed and interpreted in accordance with the laws of India. The place where the contract is to be performed shall have exclusive jurisdiction over all matters arising out of or in respect of the contract.

9.8 Timelines

Item	Date
Pre-Bid Meeting	9 th October 2024, 11:30 AM
Deadline for submission of queries	9 th October 2024, 11:00 AM
Deadline for Proposal Submission (Technical and	14 th October 2024 till 10:00 Hours

Financial proposals)	
Presentation by Vendors	14 th October 2024
Opening of financial bid	Will be communicated later

Note: Timelines may be changed with prior information.

9.9 Venue

Venue for all the events will be

Conference Room Ground Floor, NBCC Tower, 15, Bhikaji Cama Place, New Delhi-110066

10 Annexures

10.1 Annexure-I: Indicative List of Data sources for various applications

Sl. No.	Applications/ Source Systems Name	Data Capture Frequency	Historical Data Volume	Historical Data Duration	Yearly Incremental Data Volume
Core Application Based Data					
1	UDISE+ - School Directory Management System	On demand	500 GB	10 Years	25 GB
2	Student Data Management System	Yearly	1 TB	1 Year	1 TB
3	Teacher and Infrastructure	Yearly	500 GB	10 Years	25 GB
Transactional / Scheme Application Based Data					
4	PRABANDH	Yearly			
5	PM POSHAN	Real Time	500 GB	13 Years	50 GB
6	PM SHRI	On demand	5 GB	1 Year	2.5 GB
7	NIPUN Bharat	Quarterly	2 GB	1 Year	500 MB
8	STARS		100 MB		
9	KVS employee Transfer	Yearly	1GB per Teacher Data+ 50GB docs	1 Year	55 GB
10	School GIS	NA	2.5 GB	NA	NA
11	Dashboard and Reporting Solution	Yearly	7 GB	10 Years	1 GB
12	Vidyanjali	Real Time	1 GB		
13	National Achievement Survey	Once in 3 Years	18 GB	1 Year	18 GB

10.2 Annexure-II: Indicative List of Applications / Programs which shall be undertaken initially for the designing the Data Analytics solution

UDISE+ - UDISE+ (Unified District Information System for Education Plus) is an updated and improved version of UDISE, the school education database system in India. It is an online system for collecting and managing data related to schools in India, covering all aspects of school education from primary to higher secondary levels. UDISE+ aims to enhance the quality of educational statistics by improving data collection mechanisms and ensuring timely availability of data.

10.3 Annexure-III: Indicative dashboard / KPIs data analytics on Data Analytics solution

S.N.	Indicative Dashboard / KPIs
1	i. Data Access & Filters: Develop functionalities for users to filter data by State and District. ii. Enrollment & Teacher Distribution Reports (estimated number of KPIs - 30): Implement reports and visualizations for exploring every dimension of the student and teacher data available: a. Total Student Enrollment (National & State Level) with Time Series Charts. b. Split by Gender, School Management, Category, and Type. c. Growth in Enrollment by Region (Last 3 years) using Interactive Line Charts. d. Total Teacher Count (National & State Level) with Time Series Charts. e. Split by Gender, School Management, Category, and Type. f. Pupil-Teacher Ratio (National & State Level) visualized using Bar Charts. g. Total Teacher Exceptions to uncover insights and trends h. Area wise comparison on student and teacher metrics i. PTR based drill down on current norms to identify good and at risk areas and schools iii. School Distribution Reports (estimated number of KPIs – 20) : Develop reports for: a. Total Schools, split by Category and Management. b. Growth Rate of Schools by Category and Management. c. Bifurcation of Students and Teachers across Category & Management d. Bifurcation of Schools according to teacher availability
2	i. Advanced Data Exploration: Introduce functionalities for filtering by State, District, Category, and Management. ii. Early Intervention Indicators: Develop reports (optional) to explore: a. Proportion of Enrolled Students Who Repeat a Grade Level by Socioeconomic Background and Gender (Last 5 years). iii. Teacher Qualification Analysis: Implement Interactive Sankey Diagrams to visualize Teacher Qualification Rates by Category and Management (Last 5 years). iv. Infrastructure Reports(Estimated number of KPIs: 50) : Develop reports for: a. Number of Classrooms, Libraries, and Computer Labs, etc. (National & State Level) visualized with Bar Charts. b. Table View of Data (specific columns to be determined in collaboration with stakeholders) c. Identifying schools with different infrastructure capabilities and assessing key schools and areas of impact d. Assessing different themes of infrastructure around basic infrastructure, sustainability, hygiene and exceptions
3	i. Socioeconomic Analysis(Estimated number of KPIs: 20): Introduce filters to explore Student Enrollment Growth Rate by Grade Level by Socioeconomic Background and Gender (Last 3 years) to identify potential enrollment gaps.

S.N.	Indicative Dashboard / KPIs
	ii. Infrastructure Distribution: Develop reports for Infrastructure Split by School Management, Type, and Category. iii. Resource Allocation Analysis(Estimated number of KPIs: 30): Implement reports for: a. Infrastructure Availability per Student (National & State Level) (percentage of schools with specific infrastructure like classrooms, toilets, computers). • Percentage of Schools having adequate Functional Girls Toilets. • Percentage of Students (Boys/Girls) with 60% and above for class Xth & class XIIth b. Upper Primary & Above schools having computer teachers. iv. CWSN Readiness(Estimated number of KPIs: 20): a. Percentage Schools with Teachers trained for teaching CWSN b. Percentage Schools with CWSN Infrastructure enablement c. Percentage of Teachers received Training d. Percentage of Students having accessibility to CWSN Infrastructure e. Percentage of Students having teachers who have received CWSN readiness training v. Transition Rate Analysis(Estimated number of KPIs: 15): a. Implement reports for Elementary to Secondary School Transition Rate by Location, Socioeconomic Class, Gender, and Religion (Urban vs. Rural) (Last 5 years) to uncover potential disparities. b. Upper Primary to Secondary & Secondary to Higher Secondary Analysis vi. Tabular Report View: Develop functionalities for generating detailed tabular reports.
4	Teacher Shortage Identification (Estimated number of KPIs: 10): Analyze teacher shortages by implementing reports for: i. Percentage of Schools with Teacher Shortages (Last 3 years) to identify areas requiring targeted recruitment efforts. ii. Forecasting number of teachers required to maintain PTR keeping in mind the retirement of teachers in the next 3 years - iii.
5	i. Socio Economic Analysis(Estimated number of KPIs: 10): Enrolment and Dropout Rate Changes by Socio-economic. ii. Dropout Rate Analysis: State, District wise dropout filterable by Management and Category

10.4 Annexure- IV: Future Enhancements / Potential Use-cases for Analytics Solution

1. **Predictive Enrollment & Resource Allocation:** Develop a pilot project to explore the feasibility of building a predictive enrollment model using historical UDISE+ data, demographics, and potentially external economic indicators. This model would forecast student enrollment trends for the next 3-5 years in specific regions. Based on these projections, a resource allocation simulator would be developed to recommend:
 - Number of additional teachers required by subject area.
 - New classroom construction needs based on student-teacher ratio norms.
 - Resource allocation for infrastructure development (libraries, labs) considering enrollment growth.
2. **Student Focused Performance Monitoring:** By analyzing students' study history and past performance, the solution can offer personalized recommendation engine using AI that suggests courses tailored to their strengths and areas for improvement. The solution would help students enhance their skills, align their learning paths with industry demands, and ultimately improve their readiness for future career opportunities.
3. **Automatic Administrative System:** The solution can streamline administrative functions using AI, including automation of grading, attendance tracking, and exam-scheduling. This automation can significantly reduce the administrative burden on educators, thereby allowing them to dedicate more time and resources to teaching and mentoring students.
4. **Monitoring system for behavioral pattern:** The solution shall monitor student behavior through performance tracking, and emotion detection and provide valuable insights into student engagement and classroom dynamics. By identifying students who might be struggling and understanding their emotional states, educators can personalize their teaching strategies, ultimately enhancing the learning experience.
5. **Auto-detection of data inconsistencies using AI:** AI algorithms can automatically detect and correct data inconsistencies, such as duplicates and missing values, ensuring higher accuracy and reliability. By predicting and flagging potential data quality issues, AI reduces manual effort and enhances the validity of analyses, allowing stakeholders to focus on decision-making.
6. **Use of NLP for standardization of formats:** NLP can be used to standardize data formats and cross-link data points, simplifying analysis, and reducing manual data preparation efforts.
7. **Language translation models** – The solution may be integrated with language translation model to effectively communicate with students, parents, and educators, by providing educational materials in multiple languages. The solution can support
8. inclusive learning environments and addresses the needs of language minority students. Furthermore, policymakers can evaluate programs and policies in various linguistic contexts,

promoting informed decision-making and data-driven support for diverse language groups within the education system.

10.5 Annexure-IV: Formats for Submission of the Technical Proposal

10.5.1 Compliance Sheet for Technical Proposal

#	Section heading	Details	Compliance (Yes/No)	Reference & Page No
1	Technical Proposal covering letter	As per format provided in Form 1 Annexure 4 of this RFP		
2	Summary of Bidder's Experience	Summary of technical citations as per Format Provided in Form 2 Annexure 4 of this RFP		
3	Citations as per Experience (Bidder)	Citation needs to be provided as per format provided in Form 3 Annexure 4 of this RFP		
4	Project Plan	As per format provided in Form 4 Annexure 4 of this RFP		
5	Curriculum Vitae (CV) of Key Personnel	CV's as per format provided in Form 5 Annexure 4 of this RFP. CV of any individual should not exceed 5 pages.		
6	Resource Deployment Plan	As per format provided in of this RFP in Annexure 4, Form 6		
7	Quality Certifications	Copy of the certificates which will be valid as on the date of Bid submission		

10.5.2 Form 1: Technical Proposal Covering Letter

To,
Shri Kumar Jyoti,
National Informatics Centre Services Inc.
Ground Floor, 15 NBCC Tower, Bhikaji Cama Place,
New Delhi-110066

Subject: Submission of the Technical Proposal for Design, Development, Implementation, of the Data Analytics Solution

Dear Sir,

We, the undersigned, offer to provide Design, Development, Implementation, Operation & Maintenance services with reference to your Request for Proposal dated <insert date> and our proposal. We are hereby submitting our proposal, which includes Technical Proposal and the Commercial Proposal sealed in a separate envelope.

We hereby declare that all the information and statements made in this Technical Proposal are true and accept that any misinterpretation contained in it may lead to our disqualification.

We agree to abide by all the terms and conditions of this RFP document. We would hold the terms of our proposal valid for the number of days as stipulated in the RFP document.

We understand you are not bound to accept any proposal you receive.

Yours sincerely,

(Authorized Signatory)

10.5.3 Form 2: Summary of Citations for Technical Evaluation

Summary of Citations for Technical Evaluation						
#	Assignment Name	Award Date (Month/Year)	Government (Center / State)/ PSU / Global	Status (Complete / Partially Complete)	Domain	Value of the Assignment (INR)
Category 1: Experience in design & development of large-scale data analytics solution providing services for data analytics, data visualization tools, and large-scale data integration for any government department / PSU in the last 7 years with each work order having value at least 1 Crores						
1						
2						

Note: Please note in case the project is partially complete, the realized value of the project as on date of submission of the RFP shall be considered. The same needs to be supported by Statutory Certificate by Auditor / CA Certificate

10.5.4 Form 3: Bidder's Experience – Citations for Technical Evaluation (To be used for MSP)

Following table shall be filled with the details of the Bidder

Citation Format for Technical Evaluation		
#	Item	Bidder's Response
1	Name of Bidder entity	
2	Assignment Name and Brief Description	
3	Name of Client and Address	
4	Contact Details (<i>Contact Name, Address, Telephone Number</i>)	
5	Approximate Value of the Contract	
6	Duration of Assignment (months)	
7	Award Date (month / year)	
8	Completion Date (month / year)	
9	Details of Work that defines the scope relevant to the requirement specifying Proposed Product / Solution / criteria (for which citation has been provided)	
10	Documentary Evidence attached
